Proactive Global Security

# Critical Infrastructure Protection Seminar

## It's More Than Bollards and Big Rocks!

Our current systems of emergency response and emergency management are proving inadequate for current emerging threats.

### Training Topics:

- Israel's Protection of Infrastructure & Key Resources in a Terrorist Environment
- Understanding Terrorism: Risks, Mindset and How to Stay Ahead of the Threat
- Making It Work: Translating Israeli Concepts to Work Within U.S. Laws and Standards
- Discussion Panel

How many times does emergency medical care for wounded responders need to get delayed before we acknowledge the need for a change?

How many times will we respond to exploded or suspected IEDs before we consider the presence of hazardous materials and/or WMD?

How much longer will we ignore the security needs of our critical infrastructure and key resources?

Knowing that most terrorist attacks are staged and tested overseas before being tried in the US, how much longer will we pretend we are ready for a catastrophic event like the mall attack in Nairobi, Kenya?

The Israelis have a comprehensive, approach to emergency response and incident management. Join us for an afternoon with veteran Israeli intelligence experts and US responders who have toured Israel and have implemented the Israeli methodology and have the successes to prove it!

### When:

May 14, 2014

08:00-12:00

### Where:

Arvada Fire Protection District

7903 Allison Way, Arvada, CO 80005
